

3,4-Dimethoxycinnamic acid

3,4-Dimethoxycinnamic acid

【化合物】 Dimethoxycinnamic acid

【測定機器】 LC-MS

【対象】 動物（ヒト）

【代謝実験】 コーヒーを飲んだ後の血清中の dimethoxycinnamic acid 関連化合物の分析： By using an LC-MS method, 3,4-dimethoxycinnamic and 3,4-dimethoxy-dihydrocinnamic acids were detected in human plasma after treatment with an esterase. 3,4-Dimethoxycinnamic acid was present in high abundance (~380 nM at 60 min) in plasma upon coffee intake. [Nagy et al., *Journal of Chromatography A*, **1218**: 491–497 (2011)]
